THE STUDIO

HELLO! We are Imagery! Our studio is based in the North West of England. We are a team of creative individuals, proud to provide leading Archviz, Interior Design and Space Planning services to architects & designers, housing developers, furniture manufacturers and marketing agencies. We deliver our services across the United Kingdom and around the world.

At "Imagery" we are passionate about design. We listen to your requirements and we create spaces beyond your expectations. Our creative team follows the latest trends in interior design, while using industry leading technology, we are capable in offering world class Architectural Visualisations and interior Design solutions. We are dedicated to ensuring that each project, either big or small, is delivered seamlessly, meeting your deadline and budgetary requirements.

Our in-house team of designers and artists, paired with a network of selected freelancers, allows us to be flexible and extremely responsive to your requirements, provide design services in competitive pricing, yet keeping our design quality standards at the top of the industry.

Imagine it... we create it!

services

- Realistic 3D architectural visualisations & product modeling
- Integrated interior design solutions
- Space planning

3D INTERIOR VISUALIZATIONS

CGI is an exciting yet important tool that helps in communicating creativity and concepts. Our mission is to make sure that everything will be the way you envisioned it and make the most out of it for you, your team or your clients. Our 3D artists can deliver visuals of extreme quality, detail and realism giving you the opportunity to visualize your space before it's created.

3D exterior visualizations

With multiple years of experience and a solid architectural background, we are capable of reading and understanding architectural building drawings. This minimises errors in the modeling process and allows us to build highly detailed and accurate architectural models. Our advanced technical expertise paired with our passion for creativity, give us the opportunity to create visuals that simply stand out.

PRODUCT MODELING & STUDIO RENDERS

Our artists can deliver high detail product modeling and rendering in a virtual studio environment. 3D Models of objects can be built from provided photos, drawings or explanatory sketches.

virtual reality

Imagery Creative Studios bring visual communication to a new exciting level. Stereoscopic 3D 360 renderings of interior spaces, give an immersive VR experience and bring our interior solutions in life before your eyes. You should see it to believe it!

INTERIOR DESIGN

Our holistic approach to Interior Design allows us to create inspiring interiors, both beautiful and functional in equal measure. Our in-house team of interior designers and space planners can deliver outstanding design services, from creating initial concepts to 2D plans, 3D CAD modelling and mood boards for a wide range of projects including in commercial, residential and hospitality sector. Drawing from our extensive Interior Design experience, we create schemes that are exciting, unique, contemporary and sublime.

creative SKETCHING

Go Creative!

Hand sketching is an alternative approach when a project demands a more creative touch. With a wide range of artistic media such as pencils, coloured pencils, watercolours, acrylics etc, we can deliver traditional yet digitally mastered hand drawn sketches. Drawings are created using advanced digital sketching equipment, giving the flexibility to easily import sketches into presentations.

MOODBOARDS

Inspiring moodboards, fabrics & colour scheme boards, digital or made with physical materials. A creative and effective presentation tool that conveys the look and feel of a design concept.

SPACE PLANNING

Our planning team consists of industry professionals with vast experience in designing and creating functional yet aesthetically exceptional spaces. With an extensive inventory of projects we can offer space planning solutions and CAD/BIM support to professionals for spaces ranging from small offices to large scale workspaces, education, hospitality or residential.

Layouts are created using the latest version of AutoCAD & Revit software to make sure we are fully compatible with your design workflow.

3D photorealistic / graphic space plans are also available depending on your project requirements.

our mission & commitment

Our primary goal is to support and fulfil your design requirements in the best possible way. We re comitted to deliver first class design solutions, 3D visuals of stunnung quality and implement our design expertise to every single design enquiry.

No job is a small job and every project is equally important to us. Our team follows a seamless workflow throughout the design process and makes sure all the key elements are communicated with you in every single stage of the project. In this way we achieve to create quality visuals and design solutions to suit your needs.

Imagine it... we create it!
